

Case Study - Self Escape Hoods (HKMTRC, Jul 2005)

In 2005, Science International Corporation supplied 300 sets of Germany Draeger Self escape hood to Hong Kong Mass Transit Railway Corporation. In case of any emergencies, train driver can take out the hood which is placed in each control room inside the train. The hood can filter out toxic gas and last for at least 15 minutes. In this period, the driver can make certain instructions to guide passengers.
