

RAE Systems, Asia-Pacific Sales and Service Training Meeting 2007 (Shanghai, Nov 2007)

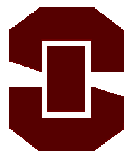

Date: 5 -6 Nov 2007

Venue: RAE Systems Shanghai plant

RAE Systems' technologically advanced products are based on proprietary technology, and include a full line of portable, wireless and fixed atmospheric monitors and photoionization detectors and gamma and neutron radiation detectors for the detection and early warning of hazardous materials. In year of 2007, Asia-Pacific Sales and Service Training Meeting was held in RAE Systems Shanghai Plant. All of the Asia-Pacific distributors were invited to attend the meeting.

Science Laboratories Limited was honor invited to attend the Asia-Pacific Sales and Service Training Meeting held in Shanghai Plant.
